

OVERVIEW

Safe-Pro multi-curved lightweight Generation 2 Enhanced Small Arms Plate is designed to withstand three impacts of up to 7.62 x 63 mm AP M2 and six impacts of each of six additional rifle projectiles. The projectile threats, the shot location and the impact velocities are strictly in accordance with the U.S. Army ESAPI Body Armor Plate Standard.

SPECIFICATIONS

Model: SP-ESAPI-GEN2-L/M

Sizes: Front / Back: Nominal sizes: U.S. ESAPI Large: 250 mm x 300 mm (L); U.S. ESAPI Medium: 225 mm x 275 mm (M)

Protection Level: NIJ 0101.06 Level IV Stand Alone

Shape: Multi curve with Shooters Cut

Thickness: 30 mm approximately, in accordance with the U.S. Army ESAPI plate Standard

Weight : 2.9 Kgs.

Materials: Silicon carbide ceramic, carbon fiber, aramid fiber and unidirectional laminate of ultra high molecular weight polyethylene.

Rugged & Impact Resistant, highly durable.

Finish: Black nylon spall cover, with screen printed text.

Safe-Pro has in-house capability to manufacture and deliver these plates very rapidly.

Made in the USA to military Standards
