

OVERVIEW

SAFE-PRO USA designs, engineers and manufactures vehicle armor systems to defeat threats: Blast, Fragmentation and Bullets—Handguns and Rifle. The design is customized to meet customer and end user-specific requirements.

SPECIFICATIONS

Product: Blast, Fragmentation and Rifle Threat Protection for Military Troop Carrier Vehicles.

Protection Levels: Custom Designed and End-User Specified Vehicle Armor- Rifle Threats, Blast and Fragmentation Resistant Systems which are Engineered, Tested and Manufactured in the USA.

Standards: NIJ 0108.01, MIL-STD-662F, STANAG 2920.

Vehicles: HMMWV, HEMMT, M939, PLS Tankers and applicable to numerous other military vehicles.

Protection Area of Coverage:

- Undercarriage Blast Protection underneath the vehicle floor on the Outside.
- Fragmentation Protection Inside the vehicle.
- Frontal Protection Against Rifle threats, Blast and Fragmentation, and optionally RPGs.
- Rear Protection Against Rifle threats, Blast and Fragmentation and optionally RPGs.
- Side Protection Against Rifle threats, Blast and Fragmentation and optionally RPGs.

Alternate Armor Systems:

Multiple Alternate Armor Systems Solutions are available to defeat the specified threat spectrum. These armor system vary in terms of the composite materials used, their system weight and cost.

State-of-the-Art Technologies are offered in Materials and Processing of Composite Armor
