MFR PART NO	PRODUCT NAME	PRODUCT DESCRIPTION	UOI	COMMERCIAL PRICE LIST (CPL)	QUANTITY/VOLUME DISCOUNT
SP-BB-001	Anti-fragmentation Blanket	Anti-fragmentation Blanket is used to suppress the effects of shrapnel caused by detonation of explosive devices. It can be used together with the Safety Circle (not included) as safety equipment by security personnel for safe removal and disposal of suspicious objects which can potentially detonate during removal and cause injury and harm. Overall size of 4ft X 4ft (1.2m x 1.2m), the system is easy to deploy and can be deployed in less than 5 minutes by two people. Total blanket weight is in the range of 50 lbs. or less	EA	\$ 2,347.00	NONE
SP-SC-001	Anti-fragmentation Safety Circle	Anti-fragmentation Safety Circle is used to suppress the effects of shrapnel caused by detonation of explosive devices. It can be used together with the Blanket (not included) as safety equipment by security personnel for safe removal and disposal of suspicious objects which can potentially detonate during removal and cause injury and harm. The system is easy to deploy and can be deployed in less than 5 minutes by two people.	EA	\$ 876.00	NONE
SP-BRB-332-01	Blast Resistant Bin	Custom-built, blast containment and explosive storage bins constructed from high strength composite of Kevlar / aramid material capable of sustaining high magnitude blast forces and capable of resisting up to 1 Kg. of explosive charge.	EA	\$ 5,059.00	NONE
SP-BRB-332-02	Blast Resistant Bin	Custom-built, blast containment and explosive storage bins constructed from high strength composite of Kevlar / aramid material capable of sustaining high magnitude blast forces and capable of resisting up to 1.5 Kg. of explosive charge.	EA	\$ 6,824.00	NONE
SP-BRB-332-03	Blast Resistant Bin	Custom-built, blast containment and explosive storage bins constructed from high strength composite of Kevlar / aramid material capable of sustaining high magnitude blast forces and capable of resisting up to 2 Kg. of explosive charge.	EA	\$ 9,176.00	NONE
SP-XSAPI-SGH-06	XSAPI Armor Plate	Safe-Pro XSAPI plates are designed to withstand the multiple effects of up to three impacts of armor-piercing rounds as well as seven additional rifle projectiles. Materials: Composite matrix of Hot Pressed / Sintered Silicon carbide, Pre-Pregged Carbon Fiber, Aramid Fiber, Ultra-high-molecular-weight polyethylene (Spectra or Dyneema) Weight: 7.4 lbs.	EA	\$ 1,500.00	NONE
